***Dates: May 15-16, 2021
Course Cost: \$600***

EQUIPMENT:

*Tactical Uniform or BDU
Weapon System
Eye and Ear protection
1250 Rounds of ammunition*

This course will provide students with the information and hands-on experience needed to effectively use a handgun equipped with a pistol mounted optic (PMO). This course will train personnel in the nomenclature, function, and use of PMOs.

Modern pistol optics provided law enforcement with several distinct advantages benefitting deputies and the public compare to traditional iron sights. Pistol mounted optics allow for a continual threat focus which facilitates better threat identification and management. The precise dot reticle facilitates better accuracy, eliminates many issues in sight alignment, and can provide a significant improvement in low light accuracy and speed.
